## What is Celcom Cloud Suite?

**Celcom Cloud Suite 'powered by Microsoft Azure'** is a flexible & scalable infrastructure & storage "Go to Market" solution, and an enterprise-class cloud service focused on Infrastructure as a Service (IaaS) and Platform as a Service (PaaS). It allows customization and personalization based on your business needs and offers unparalleled potential for improving business performance and increasing profits. The suite is also flexible, enabling you to easily add on products and features as and when you need them, thereby reducing the need for additional IT resources and enhancing cost-effectiveness with comprehensive and professional services through Celcom Business.

Created to provide a wide range of solutions suitable for all types of industries, Celcom Cloud Suite is accessible to anyone, anywhere, anytime and comes with a 24/7 technical support team.

# How does it work?

For businesses, cloud services leverage the Internet as a platform to provide tools that allow a multitude of cloud-based capabilities to be delivered, such as, applications, infrastructure, data storage, network software and security. Businesses also have the added advantage of having these capabilities seamlessly deployed across their organization reliably. These services allow businesses to optimize resources utilization and enable simultaneous multiple users access, making it easier to work from office, home, or any other location.

Celcom Cloud Suite optimizes data center resources making them secure, reliable, and also protected against data loss through enhanced data usage policy and control over sensitive data. With excellent suite collaboration capabilities, Celcom Cloud Suite promotes productivity and allows businesses to manage IT resources, software and information through the cloud that is secure and reliable.

## How can it help your business?

Demand for solutions and resources to optimize performance increases as your business grows. You want to discover the best business solutions to enable the smoothest technology expansion that aligns with your business capabilities.

By leveraging the flexibility offered by the pay-as-you-go option, your business will be able to reduce operating costs, run infrastructure more efficiently, and most importantly, improve your business performance in the long run.

## Who should use it?

Whether your business is just starting out or is already established on a small or large scale, Celcom Cloud Suite is designed to suit everyone and anyone - from the corporate sector, to the public sector and SMEs. It provides a wide range of solutions that are suitable and scalable for all types of industries, and takes care of all your business needs.

# Celcom Cloud Suite at a glance
